Continuation Sheet (PTOL-303)

Application No.

Continuation of 3. NOTE: Applicant appears to add some of the functionality of the components of the channel estimator recited in claim 8 into the estimator of claim 1 with this after final amendment. Previously allowed claim 8 discloses the specific components for processing data and generating proper output signals. The amendment to the estimator of claim 1 does not discloses these components. The wherein clause of claim 1 does not limit the claimed apparatus to a particular structure, specifically the structure stated in previously allowed claim 8. Therefore, the amendment would require further consideration and/or search.
